

User Interface Testing

Feedback: We have feedback messages that let the user know whether the action was successful or not.

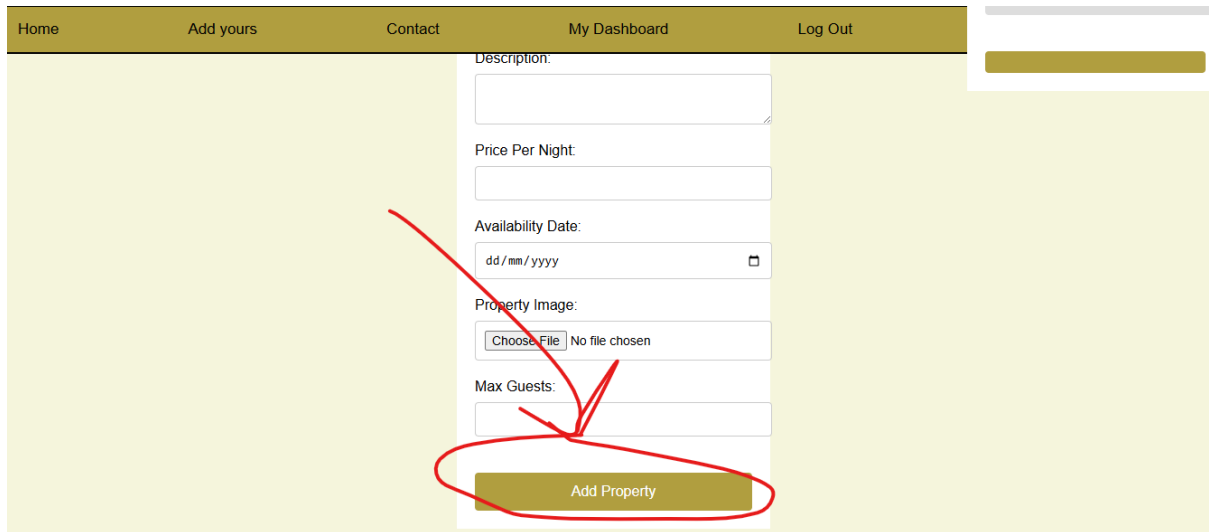

Consistency: Most buttons on website have a consistent design and color across all the pages and link to other pages

Minimal User clicks: Wee kept it very simple for landlords to add a new property, with just 1 click to the add your house page

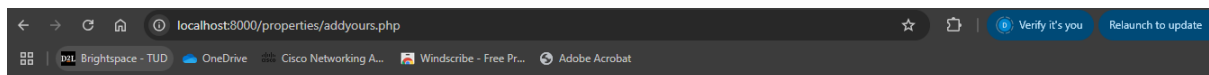

Then filling out form and second click on submit and the property is up and running!

The screenshot shows a web application interface with a navigation bar at the top containing links: Home, Add yours, Contact, My Dashboard, and Log Out. The main content area is a light yellow background. In the center, there is a white form titled 'Add Property'. The form contains the following fields: 'Description:' (a text area), 'Price Per Night:' (a text input), 'Availability Date:' (a date picker showing 'dd/mm/yyyy'), 'Property Image:' (a file upload button labeled 'Choose File' and 'No file chosen'), and 'Max Guests:' (a text input). A red circle is drawn around the 'Add Property' button at the bottom of the form. Red arrows point from the 'Choose File' button and the 'Max Guests' input field towards the 'Add Property' button.

Guidance:
